

3rd Annual UCSF Pediatric Limb Difference Webinar

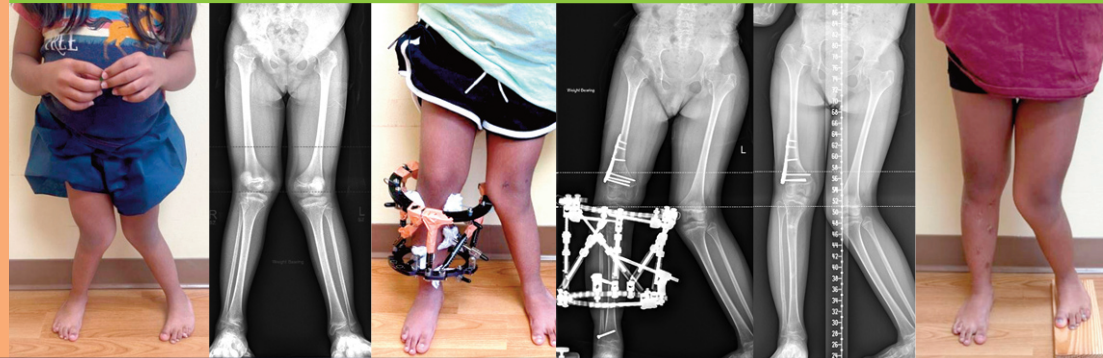

A Team Approach for Pediatric Limb Optimization: Local to Global • Friday, June 7, 2024 • Save The Date

UCSF

An interactive, bi-directional learning opportunity, highlighting the global approach to management of children with lower limb differences, deformities and length discrepancies. This webinar includes expert national and international faculty who will discuss the following themes:

1. Lower limb optimization: Concepts and approaches
2. Team building: Setting up a limb reconstruction practice
3. Teaching and training limb reconstruction: Relevant and sustainable
4. Tips and tricks for pediatric limb reconstruction.

This meeting will be available via **Live Stream**
7:00 am - 2:30 pm PST

<https://www.ucsfbenioffchildrens.org/clinics/limb-lengthening-and-reconstruction-center>

COURSE CHAIRS

Alexander Geraldi, PA-C

Jaclyn Hill, MD

Sanjeev Sabharwal, MD, MPH

Course Objectives

- Discuss the comprehensive management of a child with lower limb differences in diverse practice settings
- Learn how to build a multidisciplinary limb optimization program based on locally available resources
- Review the unique management of a child amputee
- Using case-based discussion, identify the treatment options and complications encountered during care of a child following musculoskeletal trauma or sepsis
- Explore opportunities for sharing knowledge and skills amongst health workers who take care of a patient with limb differences
