

PRACTICE OF
PÆDIATRIC
ORTHOPÆDICS

The reconstructed spine (discovered under a car park in 2013) of Richard III, immortalized by his final words:

“A horse! A horse! My kingdom for a horse!” Shakespeare *Richard III* Act 5 Scene 4.

This work is provided “as is,” and the publisher disclaims any and all warranties, express or implied, including any warranties as to accuracy, comprehensiveness, or currency of the content of this work.

This work is no substitute for individual patient assessment based upon healthcare professionals’ examination of each patient and consideration of, among other things, age, weight, gender, current or prior medical conditions, medication history, laboratory data and other factors unique to the patient. The publisher does not provide medical advice or guidance and this work is merely a reference tool. Healthcare professionals, and not the publisher, are solely responsible for the use of this work including all medical judgments and for any resulting diagnosis and treatments.

Given continuous, rapid advances in medical science and health information, independent professional verification of medical diagnoses, indications, appropriate pharmaceutical selections and dosages, and treatment options should be made and healthcare professionals should consult a variety of sources. When prescribing medication, healthcare professionals are advised to consult the product information sheet (the manufacturer’s package insert) accompanying each drug to verify, among other things, conditions of use, warnings and side effects and identify any changes in dosage schedule or contraindications, particularly if the medication to be administered is new, infrequently used or has a narrow therapeutic range. To the maximum extent permitted under applicable law, no responsibility is assumed by the publisher for any injury and/or damage to persons or property, as a matter of products liability, negligence law or otherwise, or from any reference to or use by any person of this work.

DEDICATION

“To our families, for whose support we are profoundly grateful.”

PREFACE

The mind is not a vessel to be filled, but a fire to be kindled.

Plutarch

This is a book founded upon principles and guided by practicality. It was conceived by Dr. Lynn Staheli with the goal of presenting the work of the pædiatric orthopædic surgeon in a simple but never simplistic, direct as opposed to sinuous, and most importantly readable form. We have adhered faithfully to Ockham's Principle of Parsimony, willing to sacrifice comprehensiveness at the altar of clarity for what is first and foremost a teaching tool and not a surgical manual or a research compendium. The language is directive because brevity begets clarity.

Figures are rudimentary in order that they may be accessible to the reader, who might imagine drawing them, and not to distract from the

essential information. Peaks and valleys are emphasized: let the reader fill in what lies between. We acknowledge when consensus has not been reached and uncertainty leads to variability. Where there is consensus, facts are presented. Controversy is acknowledged in so far as it influences understanding and management. Where there is clinical equipoise, no recommendation is given to avoid prejudice.

We hope that the reader will find the book useful and that our patients and colleagues will accept it in gratitude for all they have taught us.

Mohammad Diab, MD
Lynn T. Staheli, MD

PREFACE TO SECOND EDITION

This second edition of the *Practice of Paediatric Orthopaedics* (PPO) was designed to build upon the strengths of the first edition. The basic objectives are the same: to provide a guide to learning the essentials of this specialty quickly and efficiently. As with the first edition, I designed, wrote, and illustrated PPO utilizing desktop publishing technology that made possible a full-color, extensively illustrated book that is affordable.

This edition was greatly enhanced by my coauthors. Each is an acknowledged expert in their fields and each contributed substantially to improving their chapters.

Royalties for this publication will be donated to Global-HELP Organization to make health care publications available without charge for use in developing countries.

The new features and instructions for readers are detailed below:

NEW FEATURES

- Coauthors contributed information and edited content.
- Text is updated and expanded.
- New illustrations have been added.
- Illustrations have been updated and improved.
- Topic discussion and procedures consolidated.
- Upper limb and hand chapters separated and expanded.
- Contents presented on end sheets to simplify access.
- Publication reformatted for production in Adobe InDesign.
- Anticipated readership expanded to include general orthopaedists, residents, nurses, therapists, and students.

PREFACE TO FIRST EDITION

The *Practice of Paediatric Orthopaedics* (PPO) was designed to make learning children's orthopedics efficient and pleasant. This book provides core information, references, and e-mail access to experts. I designed, wrote, and illustrated PPO utilizing desktop publishing technology that made possible a full-color, extensively illustrated book that is affordable. To insure accuracy and clarity, each section was reviewed by at least two consultants. Consultants are acknowledged authorities.

The general features of PPO are listed below. Please read—*Instructions to Readers*. 2001

GENERAL FEATURES

- Designed for general orthopedists and residents.
- Provides core information on paediatric orthopaedics.
- 37 consultants edited content and may accept e-mail consultations.
- Current references are provided.
- Compact, efficient design, with over 400 pages and 2,500 illustrations.
- Practical, how to book details common problems.
- Management recommendations are whole child oriented.
- Mainstream approach to management—safe and proven.
- Management recommendations are current.
- Trauma and procedures are presented in greatest detail.
- Flowcharts are added to guide management.

Table of Contents

Introduction		Slipped Capital Femoral	
Growth	1	Epiphysis	81
Principles of Disease	3	Coxa Vara	86
Care of the Child	4	Snapping Hip	87
Upper Limb		Exstrophy of the Bladder . . .	88
Development	7	Protrusio Acetabuli	88
Evaluation	8	Femoroacetabular	
Deficiency	8	Impingement	89
Failure of Differentiation	10	Lower Limb	
Duplication	12	Anatomy	91
